

Cydia is the most popular Third-party application for iOS devices. You must have cydia to download thousands of themes and system tweaks to your device. You can also available awesome Free apps from Cydia store which is not available in App Store. Download Cydia on your device is completely FREE. But there are lots of services may require you to pay money to provide this facility. you can use our

software do it for you Totally FREE of charge.

## How Do I Get Cydia on My Device?

You can download Cydia directly to your device, it is not available on App Store or It is not available as webware. You must jailbreak your device to get Cydia (This is the only available option)

But Jailbreaking is somewhat complicated process. You must use correct tool and method according to your device and your iOS version. Cydia7 tool helps you to jailbreak your device.

Just choose your deivce models and iOS version, Cydia 7 automatically downloads most suitable jailbreaking tool and show the correct jailbreaking method ( Tethered Untethered ect)

If you use unsuitable jailbreaking tool or method sometimes it may harm your device.

1. Select Your device to proceed

2. Select device model to go ahead

3. Select your iOS version to start Jailbreak and download Cydia
